PROFESSIONAL SUMMARY

Senior MERN Stack Engineer with 3+ years of experience designing and scaling backend systems, microservices, and real-time applications for casino, marketplace, and e-commerce platforms. Skilled in building secure, high-performance REST APIs, integrating complex third-party systems (30+ game and payment providers), and deploying cloud infrastructure using Docker, AWS, and Nginx. Recently expanded into AI-driven workflow automation, building agent-based systems that streamline operational processes. Strong record of translating ambiguous requirements into scalable, production-ready systems, mentoring engineers, and quickly adopting new technologies (Next.js, LLM tooling, AI agents) without sacrificing code quality or delivery speed.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, SQL

Backend: Node.js, Express.js, REST APIs, WebSockets, Socket.io, Microservices

Cloud: AWS (EC2, S3), DigitalOcean, Google Cloud Platform (GCP)

Testing: Jest, Cypress

AI & Automation: AI Agents, Workflow Automation, LLM Integration, OpenAI API, Prompt Engineering

Frontend: React.js, Next.js, Redux, HTML5, CSS3

Databases: MongoDB, MySQL, PostgreSQL, Redis

DevOps & Tools: Docker, Nginx, Jenkins CI/CD, PM2, RabbitMQ, Git, GitHub, Linux

Architecture & Security: System Design, Scalable Architecture, Caching Strategies, JWT, OAuth, Payment Gateway Integration

CMS: Strapi

PROFESSIONAL EXPERIENCE

Geek Web Solution

April 2025 - Present

Senior Software Engineer (Nov 2025 - Present); previously MERN Stack Developer (Apr 2025 - Nov 2025) Surat, Gujarat, India

- Designed scalable backend architectures and microservices supporting high-traffic casino, marketplace, and e-commerce platforms.
- Integrated 30+ third-party casino and game providers plus sportsbook and payment gateway integrations, ensuring accurate data sync and transaction reliability.
- Built real-time features using Socket.io and WebSockets to support high-concurrency user interactions.
- Engineered a remote desktop management system for operational monitoring and control across distributed environments.
- Optimized REST APIs and implemented Redis caching strategies to reduce API response times and improve throughput.
- Implemented RabbitMQ-based message queuing to decouple services and improve system resilience.
- Designed secure authentication flows using JWT and OAuth for multi-role platform access.
- Built AI-powered agents and workflow automation tools to streamline internal operational processes.
- Containerized services with Docker, configured Nginx reverse proxies, and set up CI/CD pipelines with Jenkins.
- Deployed and maintained infrastructure across AWS EC2, DigitalOcean, and GCP using PM2 for process management.
- Worked across MongoDB, MySQL, and PostgreSQL to support varied data models, and collaborated directly with enterprise clients to translate business requirements into technical specifications.

Diamond Atelier

June 2024 - May 2025

Full Stack Developer

Surat, Gujarat, India

- Led development of a custom inventory management system that replaced manual Excel-based workflows, improving data accuracy and operational visibility.
- Built advanced filtering and gemstone search functionality, streamlining product discovery for internal teams.
- Integrated real-time chat using WebSocket technology to support live coordination between departments.
- Developed a manufacturing tracking system with real-time reporting dashboards for production oversight.
- Delivered scalable, user-friendly solutions that improved day-to-day operational efficiency.

Red And White Multimedia Education

December 2023 - June 2024

Fullstack Developer / Trainer

Navsari, Gujarat, India

- Mentored 100+ students in full-stack web development through hands-on, project-based instruction.
- Built an AI-powered mock interview platform to simulate real-world technical interviews for students.
- Automated assignment evaluation using Jest and Cypress, reducing manual grading effort.
- Designed curriculum assignments and led coding sessions covering JavaScript, React, and Node.js fundamentals.
- Built internal automation tools to support day-to-day training operations.

Applore Technologies

August 2023 - November 2023

MERN Stack Developer

Noida, Uttar Pradesh, India

- Contributed to MERN stack applications, building REST APIs and authentication flows.
- Worked with MongoDB, Express, React, and Node.js in a collaborative development environment.

KEY PROJECTS

AI Mock Interview Platform

Overview: AI-driven platform simulating real-world technical interviews for bootcamp students.

Responsibilities: Designed the conversational interview flow, integrated AI for question generation and feedback, and built automated evaluation logic.

Technologies: React, Node.js, Express, MongoDB, OpenAI API

Impact: Adopted by 100+ students, reducing instructor time spent on manual interview preparation.

Casino & Sportsbook Platform

Overview: Enterprise-grade real-time casino and sportsbook platform integrating multiple game and payment providers.

Responsibilities: Built backend microservices, integrated 30+ casino providers and sportsbook APIs, implemented real-time features via Socket.io, and optimized API performance with Redis caching.

Technologies: Node.js, Express, MongoDB, MySQL, Redis, RabbitMQ, Socket.io, Docker, AWS

Impact: Supported high-concurrency real-time gaming interactions across multiple provider integrations.

Diamond Atelier ERP & Inventory System

Overview: Custom ERP system replacing manual Excel workflows for a jewelry manufacturing business.

Responsibilities: Built inventory management, gemstone search and filtering, manufacturing tracking with real-time reporting, and real-time chat.

Technologies: React, Node.js, Express, MongoDB, WebSockets

Impact: Digitized manual processes, improving operational visibility across manufacturing and inventory teams.

Remote Desktop Management System

Overview: Internal tool for remote monitoring and control of distributed operational systems.

Responsibilities: Designed system architecture, implemented secure remote session handling, and built monitoring dashboards.

Technologies: Node.js, Express, WebSockets, React

Impact: Enabled centralized operational control across distributed environments.

ACHIEVEMENTS

- Integrated 30+ third-party casino and payment providers into production systems.
- Mentored 100+ students in full-stack web development.
- Designed and shipped AI-powered workflow automation tools adopted for internal operations.
- Reduced API response times through Redis caching and query optimization.
- Built and deployed scalable microservices architecture supporting multiple high-traffic platforms.
- Automated assignment evaluation pipelines using Jest and Cypress, cutting manual grading effort.

EDUCATION

Uttaranchal University BCA - Computer Science	April 2023
Masai School Full-Stack Web Development Program	August 2022 - April 2023
Mahatma Gandhi Inter College, Gorakhpur Higher Secondary - Mathematics	2020 - 2022
